

City Impact

The City Impact experience aims to strongly motivate students to move beyond their comfort zone, enabling them to extend and challenge themselves through a series of planned activities.

Aims and Objectives

City Impact aims to:

- Provide rural students with the opportunity to come into contact with Melbourne at large. For many students, this may be their first opportunity to experience the city environment.
- Strongly motivate students to move beyond their comfort zone, thereby enabling them to extend and challenge themselves through a series of planned activities.
- Provide students with the opportunity to experience some of the many opportunities and facilities that Melbourne has to offer.
- Teach students how to navigate the complexities of the public transport system by providing them with first hand experience.

Through participation in City Impact students will attain a level of confidence that will help stimulate them to think about options outside of their known environment when it comes to contemplating their future career. At the conclusion of their City Impact experience, it is hoped that students will have gained a degree of familiarity with the city environment.

Available resources for City Impact include a DVD.
