

Encourage the Families you work with to Notice, Explore and Talk About Maths

To help the families you work with to support their children's development at home we would like to encourage you to share the **Let's Count Bot** with them.

The **Let's Count Bot** is a quick and easy way for families to explore fun, everyday activities that support their children's maths learning. Encourage families to give it a try and turn everyday moments into maths learning opportunities!

Scan the QR codes to access the video and the *Let's Count Bot*.

Let's Count Bot Video

Let's Count Bot

Activities such as cooking, shopping, playing games and going for walks are all opportunities to discover and play with maths together. Every little moment can be an opportunity to explore numbers, shapes and patterns.

Please use the downloadable postcards and posters available on the *Let's Count* online portal to help us share the *Let's Count Bot* with families.

Notice, Explore and Talk About Mathematics in Everyday Life.
